Art Unit: 2815

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7, 8, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ushiku et al.

Ushiku et al in figure 7 teaches a plurality of layers where dummy patterns 30 are formed between upper and lower pattern in non overlapping positions.

Figure 6 shows dummy pattern 70 having a different size and shape.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Bothra et al.

Bothra et al shows in figure 3 and 5 dummy layers 226 formed in non-overlapping relationship to active regions of the substrate and in non-overlapping relationship to the active wiring network 216.

Claims 7, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Shin.

Shin shows dummy patterns formed in a circular shape different than a wiring layer 21.

Said dummy pattern having different sizes are shown in figure 5.

Claims 1-3, 6, 7, 8, 9 are rejected.

Art Unit: 2815

Claims 4, 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-13 are considered allowable over the prior art of record.

Applicant's election without traverse of claims 1-13 in Paper No.5 is acknowledged.

Kim et al, Morikawa, Mizushima, Lee, Mitwalsky et al, Umematsu et al and Travis et al are cited to show wiring layer having dummy patterns.
